# Acceptable Use Policy including Remote Online Learning and Communication

## 1. General Statement

Where computers and ICT equipment are provided, they are for the benefit of all in the learning community, and to help deliver improvements in teaching and learning. Access to the facilities is a privilege and not a right. There are some basic guidelines that staff and learners need to follow, to ensure that everyone in our school community can benefit from these facilities.

This policy should be read in conjunction with the **OCT Bring Your Own Device Policy**.

## 2. ICT equipment

Don't break or damage IT equipment, either on purpose or by being careless. This includes not eating or drinking near the computers. Please notify the ICT department of any damage to equipment or any unusual programmes in place, such as commercial software or a new web browser 'home page'.

You should only install any software or extra hardware (printers, scanners, mice, speakers) if you have first checked with the ICT department. This is particularly important for apps, as they may have wide-ranging permissions that compromise the security of your machine and the ICT network as a whole.

If you are connecting mobile equipment to the network, always ask ICT staff to help so that it is done safely and that your equipment can be virus checked and protected. Please note that if the equipment does not have anti-virus software installed then ICT staff will not add it to the network.

## 3. Security and Privacy

Use of passwords is designed to keep your data safe online and ensure that only you have access to your work. It also helps ICT staff track who is using resources and how they are using them.

You should use a strong password and must not tell anyone else what that password is. If someone else uses your account to break the ICT guidelines, and you have told them your password, you will be equally responsible for their actions. If you think that someone has tried to access your IT equipment or shared files inappropriately, please inform the ICT team immediately. On occasion, it may be necessary for you to divulge your password to ICT staff in order for them to perform maintenance, updates and install software to equipment. Passwords can be reset once completed.

Always lock computers and mobile devices when you are away from your desk or workspace, to prevent others accessing your files and information.

You may have access to shared drives or shared network areas. These are provided to help collaborative working and shared research. Do not abuse these facilities to try to gain access to areas that you should not be looking at. If you find that you are able to see files and content that you don't think you should, please inform the ICT staff immediately.

If you have access to confidential or personal information as part of your work, this must be kept only in the designated secure areas and applications. You must not disclose any personal information to anyone who does not have a right to see it.

## 4. Password Policy

All passwords should be reasonably complex and difficult for unauthorized people to guess. Employees should choose passwords that are at least eight characters long and contain a combination of upper- and lower-case letters, numbers, and punctuation marks and other special characters.

In addition to meeting those requirements, please avoid using any simple passwords, due to these being easy to crack. For instance, choices like “password,” “password1” and “Pa\$\$w0rd” are equally bad from a security perspective.

A password should be unique, with meaning only to you. That means dictionary words, common phrases and even names should be avoided. One recommended method to choosing a strong password, that is still easy to remember: Pick a phrase, take its initials and replace some of those letters with numbers and other characters and mix up the capitalization.

If the security of a password is in doubt— for example, if it appears that an unauthorized person has logged in to the account — the password must be changed immediately.

Employees must refrain from writing passwords down and keeping them at their workstations.

## **5. Acceptable use of the Internet**

Staff and learners are encouraged to explore the internet and use a range of resources for teaching and learning. This should be done in a responsible way.

Rules about internet use apply equally to all staff and learners. This helps to promote shared values within the school.

Use of the internet is monitored to help ensure network security and promote efficient use of the available resources. Unusual volumes of traffic will be noted. If you are using significant internet resources, you may be asked to explain how this promotes the school's aims and values.

Network filtering is in place to prevent access to inappropriate sites, and there is keyword logging software that flags certain terms. It will be clear to you if you have 'hit the firewall' by using a search term or location that may be inappropriate, or if your access to a site or resource is blocked. If that happens, please make a note of what you were trying to do at the time, as you may be asked to explain later.

Please notify ICT staff immediately if you access any inappropriate sites by accident, or if you find inappropriate content on a workstation or the internet.

You must use the internet in accordance with UK law. Any illegal use will be dealt with through official channels, which may include the involvement of police if a crime has been committed.

## **6. The school email system**

The school provides an email system to facilitate teaching and learning. It allows staff [and learners] to communicate quickly with one another, and to provide a quick and easy way to deal with outside agencies on any school business.

Anything sent through the school email system may be accessed and viewed by senior leaders if there is a valid reason to do so. The school will directly access email accounts in the course of an appropriately authorised investigation.

Staff should not email school files or documents to personal email accounts. If you are sending a document to yourself to work on at home or at another site, use the school email address or a shared cloud server provided by the school, such as OneDrive, SharePoint or Google Drive. Use of email may be subject to monitoring for security and/or network management reasons.

Your school email address should only be used for school business, and in connection with teaching and learning. It should not be used for general everyday purposes.

Staff [and learners] should be aware that it is unacceptable to use the email system to send or receive any material that is obscene or defamatory, or to use it to in any way intended to annoy, harass or intimidate another person. Any reporting instances of using email in this way will be dealt with by senior leaders.

## **7. Email Security**

Orchard Community Trust has strong email and internet security in place. However, there is always the risk that scam, phishing or chain emails may get through this, and be received on your school email account. Staff and learners need to be aware that not everything sent to your school email account may be what it seems. Scam or phishing emails may contain content such as viruses, malware and ransomware. Viruses infect your machine and make it harder to use, by example by making you unable to open programs, or changing your default internet login page to a scam site. Malware may track information such as your web visits and keystrokes and send this back to the scammer. This may allow them to access your online accounts. Ransomware encrypts files on your machine and locks them down. When you try to open them, you see a ransom demand to have them decrypted and returned to you.

If you receive an unusual or suspicious email, you should not open it. You should delete it from your 'inbox' and your 'delete' box and notify ICT staff. Please forward suspicious emails to the ICT department. Tell ICT support basic details about the email subject and address and allow them to investigate.

## **8. Using ICT equipment away from the school site**

You should take care when using or transporting school-issued ICT equipment away from the school site. You will be responsible for taking all due care to ensure that it is kept safe and is not lost or stolen.

You should take additional care if working offsite to ensure that data and information on your machine is not accessed by anyone else. You should use your password and lock the machine if you are away from it for any length of time. Make sure your screen cannot be seen by other people if you are working in a public place.

Any apps or logins to school systems should be closed when you are no longer using them. This will ensure that any personal data being accessed is kept safe and secure.

Memory sticks (USB's) are not secure and can be easily mislaid. There are many preferable alternatives to using memory sticks to transfer and access documents away from the school site. This might include using the schools One Drive/Google Drive and school email accounts for storing and accessing documents or data. If there is no alternative to using a memory stick, for example if you do not have internet access at your offsite workplace, then the memory stick must be encrypted.

## **9. Understanding USB risks**

USB drives have gained popularity due to their huge data storage capacity. The problem with mobile devices, however, is their proneness to theft and thereby vulnerability to data theft. The use of USB flash drives might simplify life but unless adequate security measures are taken, we are left vulnerable to the threat of data loss. Ensure that your USB flash drive encrypts the data as soon as it is stored in the device with the full disk encryption feature. This will not only restrict the use of the drive to computers that have compatible encryption software but also help avoid unauthorized access to data. We highly recommend the complete avoidance of using USB devices at all times.

## **10. What is unacceptable conduct?**

Orchard Community Trust aims to encourage positive use of ICT equipment to enhance teaching and learning opportunities. Using the resources and facilities in any way that is not positive and goes against the spirit of this Policy could be considered to be unacceptable.

In particular, all users must be aware that they must not use the school equipment or network to obtain, download, send, print, and display or otherwise transmit or gain access to materials that are unlawful, obscene or abusive or contain other objectionable materials. In addition, any kind of abuse of others is unacceptable. This would include any actions that intend to belittle others based on their race, gender, religion, sexual orientation or other aspects of their chosen social character.

Neither staff nor learners should use the ICT facilities for commercial activities or money-making schemes. The only exception to this could relate to approved fundraising for charity; this must be signed off by senior management before any emails are sent.

Using, uploading or downloading any commercial software or any software not approved by ICT is not acceptable. This includes using third-party browsers or VPNs to bypass internet filtering and monitoring.

You must not try to bypass, uninstall or compromise antivirus, antimalware and anti-spyware software, and don't open any files from removable media, or from the internet, without first checking that they are free from virus or malware.

## **11. What might we monitor?**

In order to keep the network secure and available for all, and to help protect everyone in our learning community, we will monitor certain aspects of ICT and network use. This may include looking at the volume of internet, email and network traffic, logging any internet sites visited, and logging keywords that are rejected by our Firewall.

Our school MIS package, used by staff to record information about learners and the day-to-day business of the school, has an audit function. We will use this periodically to monitor access to the system, and to ensure that it is only being used for operational reasons that enhance teaching and learning.

The specific content of any transactions will only be monitored if there is a suspicion of improper use. If there are concerns about the way a student or learner is using the ICT facilities, this may lead to further conversations with teachers or senior managers.

ICT staff are permitted to directly access staff [and learner's] email accounts if authorised by senior management, to check that they are being used appropriately. You will be told if that has occurred.

## **12. What could happen if you don't follow these rules?**

These rules are intended to keep everyone in our learning community safe, and to ensure that we all benefit from the opportunities for improved and enjoyable teaching and learning that ICT can offer.

Anyone failing to comply with these guidelines can expect further action to be taken. For staff this could include disciplinary action under the disciplinary procedure.

If any criminal acts have taken place, then we will involve the Police as appropriate. They will have full access to all logs, back-ups and records that we hold in relation to any alleged wrongdoing.

## Appendix 1 - Acceptable Use Policy Declaration for Remote Learning.

School:	
---------	--

### Guidance Notes

This addition to the policy template is provided for schools across OCT using remote learning, including live lessons, and other forms of online communication.

This template specifically addresses safer practice when running formal remote learning, including live streaming, but could also apply to other online communication, such as remote parent meetings or pastoral activities. However, there is no expectation that staff should run formal live streamed sessions or provide pre-recorded videos; settings should implement the approaches that best suit the needs of their community and staff following appropriate discussions.

### Leadership Oversight and Approval

- Remote learning will only take place using platforms approved by the Trust.
- The platforms have been assessed and approved by the Headteachers.
- Staff will only use **(Insert School name)** managed or specific, approved professional accounts with learners and/or parents/carers. It is recommended staff use separate school approved professional accounts. Acceptable and appropriate use agreements are used between school and parents (signed).
- Use of any personal accounts to communicate with learners and/or parents/carers is not permitted by staff members.
- Any pre-existing relationships or situations which mean this cannot be complied with will be discussed with the Headteacher / Designated Safeguarding Lead (DSL).
- Staff will use work-provided equipment where possible e.g. a school/setting laptop, tablet or other mobile device.
- Online contact with learners via electronic means to parents/carers will not take place outside of the agreed operating times as defined by SLT:  
**(Insert expected times)**
- All remote platforms will be formally agreed; a member of SLT is able to drop in at any time and has access to all year groups.

### Data Protection and Security

- Any personal data used by staff and captured by **(insert the approved platform name used)** when delivering remote learning will be processed and stored with appropriate consent and in accordance with our data protection policy
- All remote learning and any other online communication will take place in line with current **(Insert School name)** confidentiality expectations.
- Staff will not record lessons or meetings using personal equipment unless agreed and risk assessed by SLT and in line with our data protection policy requirements.
- Only members of **(Insert School name)** community will be given access to **(insert the approved platform name used)**

- Access to **(insert the approved platform name used)** will be managed in line with current IT security expectations.
  - Using strong passwords
  - Logging off devices when not in use

### Behaviour Expectations

- All participants are expected to behave in line with existing **(Insert School name)** policies and expectations. This includes:
  - Appropriate language (written) will be used by all attendees.
  - Staff will not take or record images for their own personal use.
- Staff will remind attendees of behaviour expectations and reporting mechanisms through the Google Classroom Platform.
- When sharing videos, participants are required to:
  - wear appropriate dress.
  - ensure backgrounds of videos are neutral (blurred if possible).
  - ensure that personal information and/or unsuitable personal items are not visible, either on screen or in video backgrounds.
- Educational resources will be used or shared in line with our existing teaching and learning policies, taking licensing and copyright into account.

### Policy Breaches and Reporting Concerns

- Participants are encouraged to report concerns during remote sessions:
- For learners: report concerns to the member of staff running the session or in charge of the group or telling a parent/carer.
- If inappropriate language or behaviour takes place (written form or pre-recorded video), participants involved will be removed from the group by staff and concerns will be reported to the Headteacher.
- Inappropriate online behaviour will be responded to in line with existing policies such as acceptable use of technology, allegations against staff, anti-bullying and behaviour.
- Sanctions for deliberate misuse may include: restricting/removing use, contacting police if a criminal offence has been committed.
- Any safeguarding concerns will be reported to **(Insert Headteacher's name)**, Designated Safeguarding Lead, in line with our child protection policy.
